Nebraska Uniform Crime Reporting Program

Introduction

The Nebraska Uniform Crime Reporting (UCR) Program involves the collection, compilation and analysis of crime statistics reported by Nebraska law enforcement agencies in accordance with guides and regulations prescribed by law.

The Nebraska Commission on Law Enforcement and Criminal Justice, hereafter referred to as the Commission, administers the Program under the following statute:

Chapter 81-1425

"(6) collect, develop and maintain statistical information, records, and reports as the Commission may determine relevant to its functions."

Chapter 81-1426

"Public officers and agencies, information, records, reports; furnish to the Commission:

"(1) The Commission may obtain from all public officers or agencies whose functions include the control, apprehension, trial, or correction of criminal offenders in this state, such information, records, and reports as the Commission may determine relevant to its functions." "(2) It shall be the duty of all public officers and agencies whose functions include the control, apprehension, trial, or correction of criminal offenders to provide such information, records, and reports as the Commission shall reasonably require."

Historical Background

The counterpart of the Nebraska UCR Program is the National UCR Program under the direction of the Federal Bureau of Investigation (FBI). The National Program was the result of a need for nation-wide and uniform compilation of law enforcement statistics. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police (IACP). Today, the IACP continues to serve in an advisory capacity to the FBI in its operation of the Program. In 1966 the National Sheriffs' Association (NSA) established a Committee on Uniform Crime Records to serve in an advisory capacity to the National UCR Program while actively encouraging sheriffs throughout the nation to participate in the UCR Program.

In recent years, the FBI has actively assisted individual states in the development of state UCR Programs which are compatible with the national Program. Nebraska was one of the first states to develop a state UCR Program. After a three-month evaluation, the Nebraska UCR Program became operational on January 1, 1971. Commencing on that date all crime statistics flow through one central agency, this Commission, before submission to the National UCR Program. The State Patrol, all sheriffs' departments and all police departments of municipalities of 1,000 population and over are required to submit Uniform Crime Reports by the seventh day after the end of the month. During 1980, a total of 204 law enforcement agencies were required to submit UCR's. All UCR's are verified and all mathematical computations are checked. Any errors or questionable data are corrected by telephone contact with the agency in question. After verification and processing of data, a magnetic tape is built and submitted to the National UCR Program. This Commission publishes quarterly and annual reports based upon data submitted.

Uniform Crime Classifications

Uniformity of reporting depends upon the proper classification of offenses by the law enforcement agencies. The basic guidelines for classifying offenses are formulated by the Federal Bureau of Investigation. It must be emphasized that the following classifications are not meant to be legal definitions as they are written in the Nebraska Penal Code. The purpose of these classifications is to establish a uniform national system for classifying similar offenses even though their legal definitions may vary considerably from state to state.

Part I Offenses

(1) **Homicide—**
   (a) Murder—any unlawful killing of a human being in which the element of malice aforethought was present in the murder. Manslaughter—any unlawful killing of a human being without the element of malice aforethought.
   (b) D ..th by Negligence—any death that occurs because of the negligence of some person other than the victim and that is not in the commission of an unlawful act.

(2) **Rape—**
   (a) Rape by Force—the carnal knowledge of a female forcibly and against her will, but excluding statutory rape and other sex offenses.
   (b) Assault to Rape—all assaults and attempts to rape.

(3) **Robbery**—the felonious and forcible taking of the property of another against his will by violence or by putting him in fear. Robbery differs from larceny in that it is aggravated by the element of force.
   (a) Armed Robbery-Any Weapon—when any object is so employed as to constitute force or the threat of force, it will be considered a weapon. This would include firearms, knives, clubs, brass knuckles, blackjacks, broken bottles, acid, explosives, etc. Cases involving possible pretended weapons or cases involving weapons not

seen by the victim but which the robber claims to have with him are counted in this category.

(b) Strong Arm-No Weapon—includes muggings and similar offenses when no weapon is used but strong-arm tactics are employed to deprive the victim of his property. This is limited to hands, arms, fists, feet, etc. As in armed robbery, all attempts are included.

(4) **Assault**—an attempt or offer, with unlawful force or violence, to do physical injury to another. General Rule—all assaults will be classified in the following categories, excluding assaults with intent to rob or rape.

(a) Gun—all assaults and attempted assaults involving the use of any type of firearm. This includes revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.

(b) Knife or Cutting Instrument—all assaults and attempted assaults involving the use of cutting or stabbing objects such as knives, razors, hatchets, axes, cleavers, scissors, glass, broken bottles, daggers, ice picks, etc.

(c) Other Dangerous Weapons—assaults or attempted assaults when any object other than a gun, knife, or cutting instrument is used. This includes clubs, bricks, jack handles, bottles, explosives, acid, lye, poison, scalding water and cases of attempted drownings, burnings, etc.

(d) Hands, Fists, Feet, Etc. (Felony)—any assaults with hands, fists, feet, etc. which could result in a felony conviction. In order to be classified as a felony, the victim must suffer great bodily harm.

(5) **Burglary**—any unlawful entry or attempted forcible entry of any structure to commit a felony or larceny. For Uniform Crime Reporting purposes, burglary with larceny is classified and scored only as burglary; the larceny is excluded. Breaking and entering of a motor vehicle is classified as larceny.

(a) Forcible Entry—All offenses where force of any kind is used to unlawfully enter a locked structure to commit a felony or with intent to steal something. This includes entry by use of a master key, celluloid or other device that leaves no outward mark but is used to open a lock. Concealment inside a building followed by breaking out of the structure is scored here.

(b) Unlawful Entry-No Force—any unlawful entry when you fail to discover any evidence of forcible entry.

(c) Attempted Forcible Entry—when determined that forcible entry has been attempted.

(6) **Larceny-Theft (Except Auto Theft)**—the unlawful taking of the property of another with intent to deprive him of ownership. This involves all larcenies and thefts resulting from pocket picking, purse snatching, shoplifting, larceny from auto, larceny of auto parts and accessories, bicycle theft, larceny from buildings and larceny from any coin-operated machines. Any theft that is not a robbery or any theft that does not result from a breaking and entering is scored here. Embezzlements, unlawful conversions, larceny by bailee, frauds or bad check cases are excluded.

(7) **Motor Vehicle Theft**—larceny or attempted larceny of automobiles. All thefts and attempted thefts of motor vehicles are included. This includes all vehicles which can be registered as a motor vehicle in this state. This encompasses offenses against chastity, common decency, morals and the like such as adultery and fornication, buggery, incest, indecent exposure, sodomy, carnal abuse (no force) and all attempts to commit any of the above.

(18) **Drug Abuse Violations**—statistics for these arrests are requested on the basis of the narcotics used.

This includes all arrests for the violation of state and local ordinances, specifically those relating to the unlawful possession, sale, use, growing, manufacturing and making of narcotic drugs. Four divisions of narcotic drugs are recognized. These are:

(a) opium and cocaine and their derivatives (morphine, heroin, codeine),

(29) **Runaways**—(Juveniles) limited to juveniles taken into custody who have run away from the reporting jurisdiction.

Crime Index

The extent, fluctuation and distribution of crime in the State is measured by the crime index. The crime index is composed of the following offenses: murder, manslaughter, forcible rape, robbery, felony assault, burglary, larceny-theft and motor vehicle theft. Many categories of crime are not of sufficient importance to be included in the index; some serious crimes, such as kidnapping, do not occur with enough regularity to be meaningful in the index. With these considerations in mind, the above offenses were selected as a group to serve as a measure of crime.

Clearances

For UCR purposes, an offense can be cleared by arrest or by exceptional means. An offense can be cleared by arrest when the offender is identified, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several offenses and several persons may clear one offense. When some element beyond police control precludes formal charges against the offender, such as the victim's refusal to prosecute or death of the offender, an offense can be cleared by exceptional means. There is no distinction made between cleared by arrest and cleared by exceptional means in this publication. A distinction is made between total clearances and those involving only persons under 18 years of age (juveniles). A juvenile clearance is counted only when juveniles are exclusively involved in the clearance of an offense.

Crime Rates

Crime rates relate the incidence of crime to population. Estimates of current permanent population are used in computing crime rates. Crime rates allow for comparisons between several areas with different populations over a period of time without the information being biased by population differences. To compute a crime rate, first divide the population of the area by 100,000 and then divide the crime index by that answer. Throughout this report a crime rate per 1,000 population is used to be more meaningful for the State.

Crime Factors

Statistics gathered under the UCR Program are law enforcement statistics. The agencies report the offense and arrest data according to the standard offense classifications and not according to state statutes or local ordinances. Offenses are related to municipality and county in which they occur, rather than to the agency which may investigate, arrest or otherwise dispose of the case. The clearance is attributed to the municipality or county in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense.

The factors which influence crime rates are dependent upon many characteristics of the community, and therefore, when attempting to interpret the crime statistics presented herein, one should be aware of the social structure and the factors that lead to or cause criminal behavior.

Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community. Below are some of the conditions which

will by type and volume affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex and race.

Economic status of the population.

Relative stability of population, include commuters, seasonal and other transient types.

Climate, including seasonal weather changes.

Educational, recreational and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

Caution should always be used when using the crime statistics presented herein, however, it should also be kept in mind that the data presented is the most accurate currently available. The law enforcement personnel who provide the date are to be commended for their efforts to provide accurate data. Without their sincere cooperation, this publication would not be possible. Crime is a social problem and therefore, should be a concern of the entire community.

Nebraska Crime Index Trends, 1976-1980

Crime and Population

After decreases in crime in 1976, 1977 and 1980, the number of index offenses reported in 1980 represented a 22 percent increase over 1976. The index crime rate (per 1,000 population) rose from 34.9 in 1976 to 42.1 in 1980, a 21 percent increase. The violent crimes of murder, manslaughter, forcible rape, robbery and felony assault increased seven percent over 1976. The violent crime rate increased from 2.1 in 1976 to 2.2 in 1980. The property crimes of burglary, larceny-theft and motor vehicle theft increased 22 percent over 1976. The property crime rate increased from 32.8 in 1976 to 39.9 in 1980.

An analysis of crime trends by population groups revealed that cities over 250,000 population (the City of Omaha) had a ten percent increase over 1976. Cities of 100,000 to 250,000 population (the City of Lincoln) had a 32 percent increase over 1976.

Cities of 5,000 to 100,000 population had a 39 percent increase and cities under 5,000 population had a 43 percent increase over 1976. Counties, which include the rural area and cities under 1,000 population reflected a 12 percent increase over 1976. The State agencies which report offenses occurring on State property (the State Patrol and the University of Nebraska-Lincoln) had an 11 percent increase over 1976.

The index offenses have shown the following changes over 1976: murder, manslaughter increased 48 percent, forcible rape increased 14 percent, robbery increased 32 percent, felony assault decreased 8 percent, burglary increased 36 percent, larceny-theft increased 20 percent, and motor vehicle theft increased 5 percent.

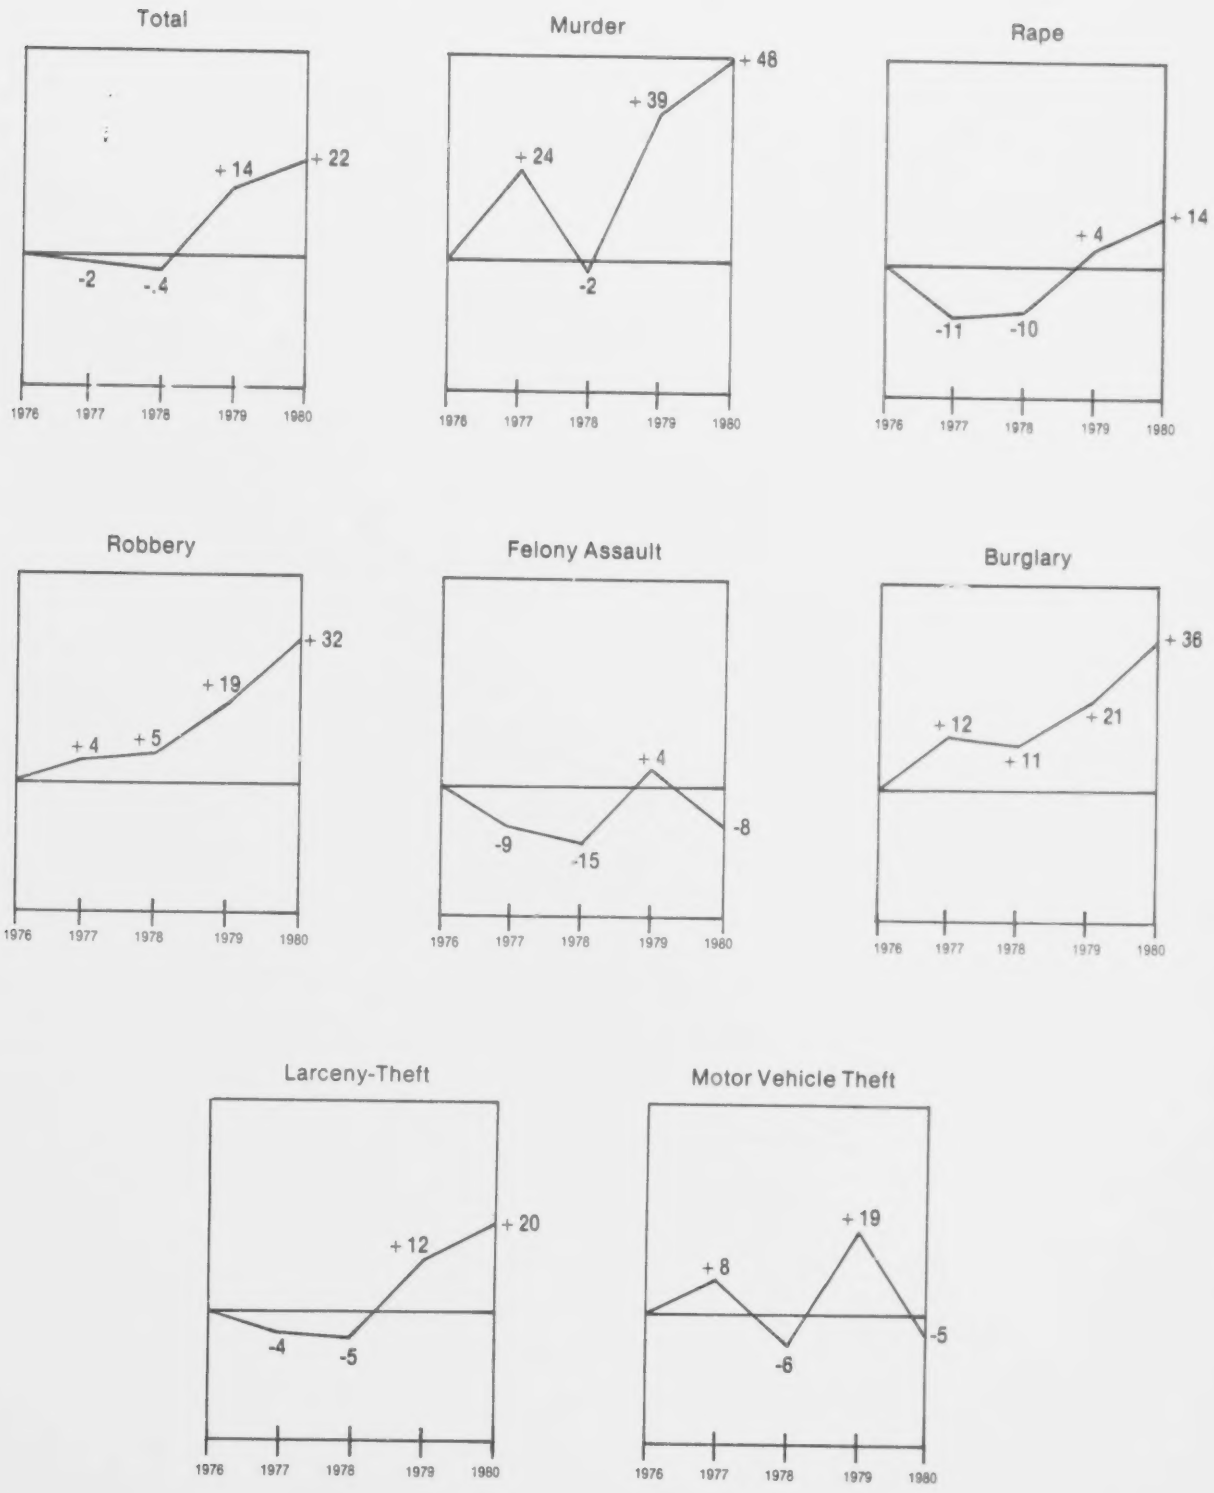
Percent Change in Index Offenses Over 1976



Crime Index Offenses—1980

Volume

A total of 66,680 index offenses were reported or known to law enforcement agencies in 1980. The violent crimes of murder, manslaughter, forcible rape, robbery and felony assault accounted for 5.2 percent of the total index offenses. The property crimes of burglary, larceny-theft, motor vehicle theft, and arson accounted for 94.8 percent of the total offenses.

Felony assault accounted for 50.6 percent of the violent crimes and larceny-theft was the most frequently reported of all crimes, accounting for 66.9 percent of the total index.

Crime Rates

Based on the preliminary 1980 census figure of 1,563,921 the crime rate per 1,000 population was 42.6 in 1980. The crime rate for violent crimes was 2.2 per 1,000 population. There were 40.4 property crimes per 1,000 population.

Clearances

A total of 15,068 index offenses were reported cleared during 1980, a clearance rate of 22.6 percent. Murder, manslaughter had the highest clearance rate, 92.8 percent. Violent crimes had a clearance rate of 59.4 percent and crimes against property had a clearance rate of 20.6 percent.

The difference between the clearance rate for crimes of violence and crimes against property can be attributed to the fact that there are more property crimes to be solved and investigations of violent crimes are usually more intense. The element of confrontation between the victim and the perpetrator, as well as witness identification of the perpetrator, contributes to the higher rate of clearance.

Murder, Manslaughter

Murder is defined as the unlawful killing of a human being in which the element of malice aforethought was present. Manslaughter is defined as any unlawful killing of a human being without the element of malice aforethought. Suicides, accidental deaths and justifiable or excusable homicides are excluded.

Volume and Rate

During 1980, a total of 69 murder, manslaughters were reported by law enforcement agencies in Nebraska. Murder, manslaughter accounted for 2.0 percent of all violent crimes (murder-manslaughter, forcible rape, robbery and felony assault) and one-tenth of one percent of all index offenses. In 1980, there were .04 murders per 1,000 population.

Murder, Manslaughter Analysis

In all cases of murder, manslaughter reported under the UCR Program, a supplementary report is submitted by the reporting agency. The supplementary report provides the age, sex and race of the victim(s), weapon used to commit the offense, relationship of the victim to the offender, and circumstances or motive leading to the crime.

The frequency of murder during 1980 was highest in the month of November when 10 murders were reported.

In 1980, male victims accounted for 61 percent of the total murder victims, with 54.8 percent of those being in the age group of 18-29. Female victims accounted for 39 percent of the total murder victims. Victim analysis by race disclosed that 69.6 percent were White, 29 percent were Black and 1.4 percent were Indian.

Of the 60 known perpetrators, males accounted for 91.7 percent and 46.7 percent of those were in the age group of 18-29. Female perpetrators accounted for 8.3 percent and all of these were between 18 and 39 years of age. White perpetrators accounted for 60 percent of the perpetrators, Blacks accounted for 35 percent and Indians accounted for 5 percent.

Most murders, 74 percent, were committed by a relative or acquaintance of the victim. A further breakdown indicated that 26 percent were committed by a relative; 48 percent were committed by an acquaintance; 20 percent were committed by strangers and in 6 percent of the cases the perpetrator(s) were unknown.

64 murder, manslaughters were cleared in 1980. Juvenile clearances accounted for 7.8 percent of the total clearances.

Handguns were used in 37.7 percent of the murders and a knife or other cutting instrument was used in 21.7 percent of the incidents.

Volume and Rate

During 1980, law enforcement agencies in Nebraska reported a total of 360 forcible rapes. Forcible rape accounted for 10.4 percent of all violent crimes (murder, manslaughter, forcible rape, robbery, felony assault) and 0.5 percent of all index offenses. Supplementary reports were received on 136 cases; the Omaha P.D. did not submit any supplementary reports. Victims under the age of 25 accounted for 74.3 percent of the total victims. Of those victims under 25, 47.5 percent were between 18 and 24 and 30.7 percent were between 11 and 15. The victim was most likely to be attacked in her own home. In 37.5 percent of the incidents the perpetrator was a stranger. In 14.7 percent of the incidents a weapon was used and it was most likely to be a knife. The victim was attacked by more than one offender in 7 incidents. Interracial rapes accounted for 14.7 percent of the incidents.

Motor Vehicle Theft

Motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. Thefts of farm equipment, bulldozers, airplanes and construction equipment are not included in the definition of a motor vehicle. Motor vehicle theft is divided into the following categories: autos, trucks and buses, and other vehicles.

Volume and Rate

During 1980, 3,745 motor vehicle thefts were reported by law enforcement agencies in Nebraska. Motor vehicle thefts accounted for 5.9 percent of all crimes against property (burglary, larceny-theft, motor vehicle theft, and arson) and 5.6 percent of all index offenses. In 1980, there were 2.4 motor vehicle thefts per 1,000 population. There were 1,084 motor vehicle thefts cleared in 1980, 28.9 percent.

Analysis of Motor Vehicle Theft

During 1980, law enforcement agencies provided additional information regarding types of vehicles stolen. The agencies reported 2,113 autos, 748 trucks and buses and 884 other vehicles stolen.

During 1980, there were 2,944 motor vehicles recovered; 78 percent were recovered within the same jurisdiction where they were stolen and 22 percent were recovered in another jurisdiction.

The age group accounting for the highest percentage of persons arrested for motor vehicle theft, 12.4 percent, occurred in the age group 15. Juveniles accounted for 46.3 percent of all arrests for motor vehicle theft.

Of the persons arrested for motor vehicle theft, 79 percent were White, 14.7 percent were Black, 5.8 percent were Indian and 0.5 percent were of other races.

Arson

Arson is any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. The reporting of arson offenses began in January, 1979, with the offenses being reported by the State Fire Marshal. Arson became an index offense in 1980.

Volume and Rate

During 1980, there were 912 offenses of arson reported. This represents 0.6 arsons per 1,000 population. There were 196 arsons cleared in 1980, 21.5 percent. Clearances involving only persons under 18 years of age accounted for 41.8 percent of the total clearances.

Analysis of Arson

The total estimated value of property damage due to arson amounted to $5,577,232 in 1980. Property damage to 513 structures was $5,197,912. The 153 mobile arsons (motor vehicles and mobile property — trailers, recreational vehicles, airplanes) resulted in $332,485 worth of property damage. In 246 other types of arson, the property damage was $46,835.

Of the 320 residential arsons, 20 percent of the residences were uninhabited at the time of the arson.

Arrest Data

Under the Uniform Crime Reporting Program, an arrest is counted each time a person is taken into custody, summoned, notified or cited. When a person under 18 years of age commits an offense and the circumstances are such that if the offender were an adult an arrest would be made, the offender is counted as an arrest by the reporting agency.

For reporting purposes, one arrest is counted each time a person is taken into custody, regardless of the number of charges placed against him. If an individual is arrested more than once during the year, an arrest is counted each time. When several persons are arrested in connection with the same offense, each is counted as an arrest.

It should be kept in mind that arrest practices and emphasis on certain crimes vary from place to place. Each reporting agency is responsible for reporting arrests made by the State Patrol in its jurisdiction.

Volume and Rate

Law enforcement agencies in Nebraska reported 51,368 arrests in 1980 for Part I and Part II offenses. This represents an increase of seven-tenths of one percent over 1979. There were 32.8 arrests per 1,000 population in Nebraska in 1980 as compared with 32.4 arrests per 1,000 population in 1979.

Arrests for Part I offenses accounted for 23.9 percent of the total arrests. Of the arrests for Part I offenses, larceny-theft accounted for the greatest portion of the arrests, 67.8 percent. The greatest percentage of arrests for Part II offenses was for all other offenses.

During 1980, arrests for crimes of violence (murder, manslaughter, forcible rape, robbery and felony assault) accounted for 10.6 percent of all arrests for Part I offenses and 2.5 percent of the total arrests.

Arrests for crimes against property (burglary, larceny-theft and motor vehicle theft) accounted for 88.1 percent of all arrests for Part I offenses and 21.1 percent of the total arrests.

Arrests for Part I offenses increased one percent over the number reported during 1979. Arrests for forcible rape, robbery and larceny-theft all showed increases over 1978.

Arrests for Part II offenses increased seven-tenths of one percent over 1979. Arrests for gambling had the greatest percentage of 102 percent.

Arrests by Age

The number of persons under the age of 18 (juveniles) arrested during 1980 decreased three percent over 1979. Arrests of juveniles for Part I offenses decreased nine percent over 1979. The arrest of persons age 18 and over (adults) increased two percent over 1979. Adult arrests for Part I offenses increased nine percent.

Of the arrests for the index offenses persons under the age of 25 accounted for 72.9 percent and persons under the age of 18 accounted for 52.6 percent of those under 25. The age group of 13-14 accounted for the greatest number of arrests in any age group for the index offenses.

The arrests of persons under the age of 25 accounted for the following percentages of the total arrests for each index offense: murder, manslaughter (44.1); forcible rape (48.0); robbery (69.4); felony assault (48.9); burglary (84.3); larceny-theft (72.5); and motor vehicle theft (79.8); and arson (71.3).

Of those persons under the age of 25 arrested for index offenses, persons under the age of 18 accounted for 15.4 percent for murder, manslaughter; 24.1 percent for forcible rape; 32.5 percent for robbery; 23.1 percent for felony assault; 48.4 percent for burglary; 56.4 percent for larceny-theft and 58.0 percent for motor vehicle theft; and 46.4 percent for arson.

Arrests by Sex

In 1980, males accounted for 81.6 percent of all arrests. Males accounted for 77.3 percent of the arrests for Part I offenses and 83 percent of all arrests for Part II offenses. Total male arrests increased 0.8 percent over 1979 and female arrests increased 0.5 percent. Females were arrested for larceny-theft more times than for any other offense. The greatest number of male arrests were recorded for all other offenses followed by driving under the influence.

Arrests by Race

A distribution analysis of total arrests by race for 1980 indicated 84.8 percent were White, 11.5 percent were Black, 3.5 percent were American Indian/Alaskan Native, and 0.3 percent were Asian or Pacific Islander. The arrest involvement by race for the index offenses revealed that 77.1 percent were White, 18.9 percent were Black, 3.6 percent were Indian/Alaskan Native and 0.4 percent were Asian or Pacific Islander.

An analysis of arrests by race for crimes of violence (murder, manslaughter, forcible rape, robbery and felony assault) revealed that 58.4 percent were White, 35.6 percent were Black, 5.9 percent were American Indian/Alaskan Native and 0.2 were Asian or Pacific Islander

An analysis of arrests by race for crimes against property (burglary, larceny-theft and motor vehicle theft and arson) revealed that 79.3 percent were White, 17.0 percent were Black, 3.3 percent were American Indian/Alaskan Native, and 0.4 percent were Asian or Pacific Islander.

An analysis of arrests by race for Part II offenses revealed that 87.2 percent were White, 9.1 percent were Black, 3.5 percent were American Indian/Alaskan Native, and 0.2 percent were Asian or Pacific Islander.

Officers Killed and Assaulted

The killing or assaulting of a law enforcement officer is an increasingly serious problem faced by the law enforcement administrator and should be of the gravest concern to the public at large. Such acts directly affect the functioning of proper law enforcement operations and thus reduce the ability of our law enforcement agencies to combat crime and maintain law and order. The ambitious young man who today considers a career in law enforcement must also consider the risk of being killed or assaulted by a member of the society he is sworn to protect.

Assaults on Law Enforcement Officers

During 1980, there were a total of 381 assaults on state, county, and municipal law enforcement officers. This represents a 27 percent increase over 1979. While every assault does not result in personal injury to the officer involved, many of them do result in physical harm to the officer and loss of duty time. During 1980, personal injury was involved in 40 percent of the assaults. A total of 1,650 duty hours were lost due to the assaults.

Most of the assaults occurred while responding to disturbance calls and most of these assaults were inflicted with personal weapons such as hands, fists, or feet.

There was one law enforcement officer killed in 1980. A State Patrolman was killed in the line of duty when he was struck by a car driven by an offender fleeing from law enforcement authorities.

Law Enforcement Employee Data

The Nebraska Uniform Crime Reporting Program surveys law enforcement agencies each year concerning employee data. At the end of October, 1980, there were 3,351 persons employed full-time in 189 law enforcement agencies.

Of the 3,351 employees, 2,451 were sworn personnel and 893 were civilian employees. Based upon an estimated population of 1,563,921 there were 1.6 sworn officers per 1,000 persons in the State. The rate of law enforcement officers per 1,000 population for any given agency in the State is influenced by many factors. The determination of law enforcement strength for a certain area is based on such factors as population density, size and character of the community, geographic location and other conditions which exist in the area.

Females accounted for three percent of the sworn personnel and 69 percent of the civilian personnel.
